Overview

Description:

SF960 adopt DSP digital controlling technology, self-design laser power supply, incorporate designed frame and structure to guarantee stable work. The newest software is matched to AutoCAD, corelDRAW CAD and all other graphics processing softwares for outputting original graphics.

This series machines firstly use USB port data interface which supports hot-plugging and momentary data transmission to realize high efficiency without accounting computer resource. The LCD controlling panel brings friendly computer-human interface and easy operation.

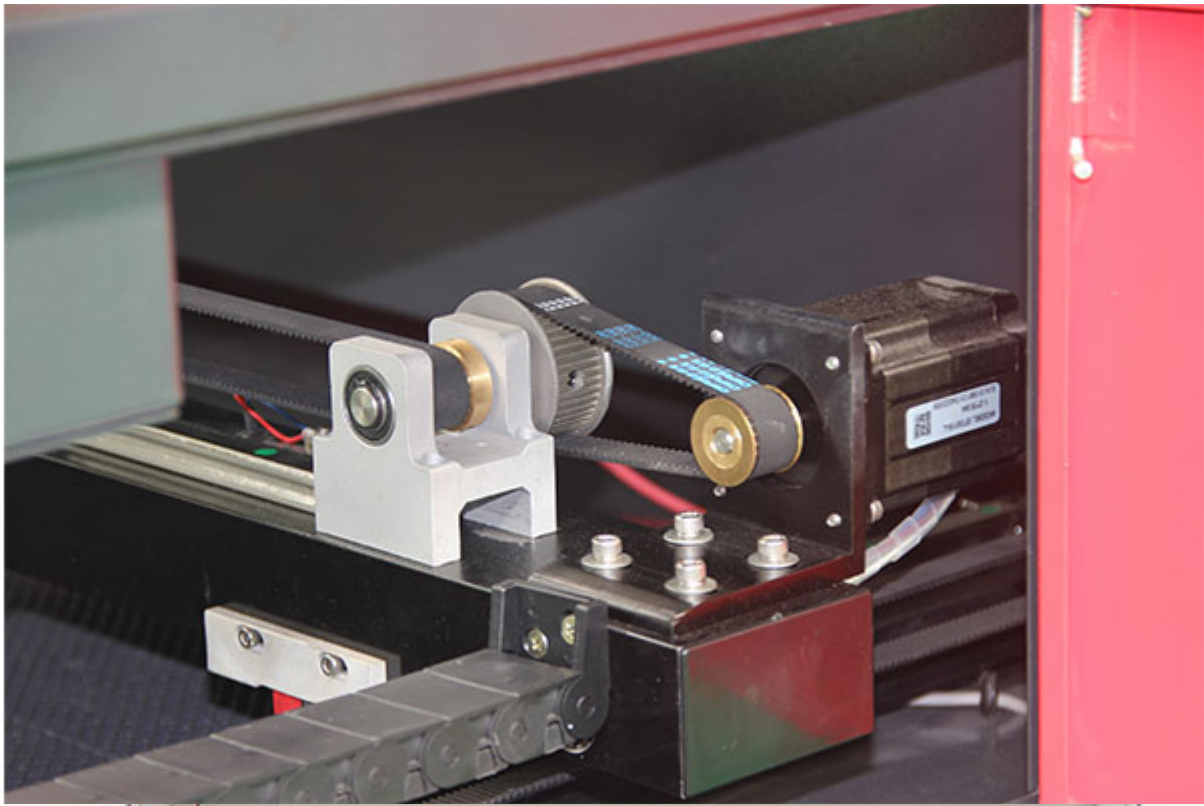

Features:

- 1.High speed, the maximum speed can be 72000mm/min which greatly improves working efficiency.
- 2.Precise engraving. professional engraving optical lens with more stable light beam and accurate postpositional red light position are adopted,
- 3.Convenient putting in and putting away of materials. Working space can be opened totally and platform can be adjusted by up-and-down device.
- 4.Engraving speed and precision can be up to leading level in China.
- 5.Design software of CAD, CORELDRAW,PHOTOSHOP are all supported for friendly human-computer interface and demand of the industries on-the-spot
- 6.It is mainly used for processing carfts and gift such as engraving on wooden boards, acrylic and double-color boards.

Applicable Industries: crafts and gifts

Applicable Materials:non-metal materials like leather,cloth,rubber,wooden boards,bamboo products,organic glass,plastics,marble,jade,crystal,etc.
