A good solution

A complete economical exhibiting solution. Perfect Fit fabric tension display stands are the most affordable graphic display option on the market, making the price very low for the end user. They still work great because their graphic prints come out sharp and clear and the hardware is durable. These trade show displays work great for exhibitors on a tight budget that still want a complete graphic backdrop. Lights and black case-to-counter conversion kits are included for a stunning look that will set you apart from other trade show booths.

How to solve

- . A variety of different fabric display wall which can use for different Combinations. It can forming the main body of the distinctive style background stand.
- . Adopting many modeling fabric tension display which can building special show atmosphere for whole conference space.
- . According to you needs, we can choose different number acrylic material bedplate to fits the fabric tension display and used to place all sorts of display samples.
- . Multimedia solutions. We can increase LCD Monitor and Brackets on the fabric display wall and fabric tension display. And then you can also choose satisfying display used for company introduction or products video broadcasting.

. The counter is essential. According to visitor's flow direction, you can increase more dye-sub fabric counter which can be used for reception staff and visitors to communicate and release publicity material.

In short, this exhibit systems can combine LCD, plasma displays, mesa, lighting and other exhibitors through the different combinations and number of increase and decrease to meet the personalized modeling design which will express your company brand creatively.

Comparative advantage

. Strong show force. The whole trade show pictures adopt high elastic non-woven meshes and the sublimation process. The meshes color is gorgeous, high-definition; Seamless image, without plait more smooth which can be repeated use.

. A complete economical exhibiting solution. Compared with traditional exhibition counter, A same size conference place or exhibition will need to 30000-50000 dollars. But using our 10 'x20' square feet exhibition booth, the cost less than \$5000.

What's more including a full-color printing and seamless picture. Unbelievable? But she's really! Why the exhibition system so cheap? Because a lot of expensive and one time used components had been removed. Such as heavy metal truss, all kinds of material panel and fittings etc.

. Convenient installation: Booth system use elegant alumina aluminum tube frame structures. The whole picture closely around the picture framework relying on a smooth zipper. It is so simple, you only need to pull the zipper and then the whole building had finished. The whole installation no need tools and only need 2 persons to finish within 30 minutes. But for the other exhibition booth? If you make installation in the morning. After dinner, you have to say: brothers, hurry up, we can't stay here overnight.

. Light, portable: A 10 'x20' square feet exhibition booth, you only need one person to show in different situation exhibition tour only with a suitcase! For 10 'x 10' square feet? This kind of exhibition system out of question.

. Stronger combination: You can choose and add all sorts of modeling of Fabric Display Wall, fabric tension display, front desk, LCD connection rack (player), magazine rack and spotlight. Outstanding and brilliant visual wallop from you follow one's inclinations of the freedom of choice.

We provide some characteristic exhibition booth combination products. So as to adapt to the most conventional 10 X10 ', '10' X20 'show the use of space. If you had not found what you wanted, we do accept customize, please inquiry us then we will get to know your needs and send free design solution to you timely.
