### Overview

#### Description:

This kind of rotary paper cutter is all designed with paper-fixing function. Upraise the rail cutter stand by your hand when you put the materials then fix well. The rotary blade makes the cutter sharp and durable. The blade is adjustable according to the thickness of materials. It is widely used to cut all kinds of photo paper, flex banner, KT board, KAPA board, etc. The cutter could cut KT board, KAPA board within 0.3"(8mm), and photo paper, flex banner within 0.1" (2mm), also for PVC board within 0.1" (1mm).

#### Features:

- . The working table is made of stainless steel.
- . Cutting from `two` directions, convenient to your job.
- . Depth of the blade is adjustable.
- . It's easy to change the blade.

---

## Specifications

---
