Overview

Auto Open Heat Press Machine with Sliding-Out Table

- Magnetic Auto Open
- No Operator Fatigue
- Digital Read-Outs
- Slide Out Press Table for Convenient Preparation

Description:

This Auto Open Heat press machine uses advanced spring air with high temperatures and pressures, to make an exact transfer on t-shirts, pants cloth, etc. Its upper heating board will rising up automatically when it reaches the time the alarm was set, alarming at the same time, so it is more convenient for transferring.

The heat press uses advanced spring air with high temperatures and pressures, to make an exact transfer on t-shirts, pillowcase, cloth, etc. The upper heating board opens automatically when it reaches the time the alarm was set, and the lower heating board can be pull

out completely, this will enlarge and improved the working space to operate more efficiently.

Features:

- Magnetic Auto Open Feature.
- Over-center pressure adjustment.
- Digital time and temperature controller.
- 16 x 20 inch Teflon coated upper heat platen.
- Slide Out Press Table for Convenient Preparation.
- CE approved.

Details

Comparison

This Machine: Integrated meters, more easy more precise.

Other Models: Separate meters which require to set time individually and make complicated.

It applies automatic return function by electromagnetics and gas spring that makes the machine open automatically at set time. Easy, useful, saving of labor and time.

Other Models: Manually press and open. Complicated.

This Machine: It uses sliding bearing with stretchable worktable which increase your work space and very convenient for placing transferring objects.

Other Models: Only open 45°degree angles with smaller working space.

This Machine: Tight design of buttons, the control button for emergency during work. Safe and convenient.

Other Models: No such configuration.

This Machine: It uses front pressure adjustment button positioned above the heating board that performs more averaged pressure on.

Other Models: With rear pressure button that makes unbalanced pressure.

Operation

Heat Platen Test:

Each Single Copper sheathed heating rod is tested before it is cast in an aluminum alloy or Mica Sheet. These heating rods are comparable to those found in industrial ovens that heat up quickly, work efficiently and last many years.

Finished Machine Test:

- 1) Turn on the machine, let it heating up to 200 degree Celsius.
- 2) Keep the temperature stay at 200 degree Celsius for at least half an hour.

The heat transfer printing technology changes our life rhythm and brings us a lot of business opportunities.
