Overview

Descriptions:

This type of heat transfer machine is European style, which has the advantages of the former heat press machines with the new developed style. The improved outlook is more attractive. This machine has nice outer appearance, an innovating structure design and Euro-style with a thicker heating board. The highlight of the machine uses an improved structure of pressure to ensure the evenness for a better effect while working.

Features:

- **High density of heating board.**
- **Digital control panel.**
- **Affordable and better printing effect.**
- **Spring-add device and thicker heating board can guarantee perfect print.**
- **Real time display of temperature condition with an automatic alarm.**
- **Easily to adjust the pressure and to operate.**
- **The improved structure of the machine allows achieving a more stable pressure.**

Applications:

It is widely used to transfert-shirts, bags, pants and others which are made of textile, knitting, non-woven, chemical fiber or cotton materials, metal sheet, adornment, etc.

Remarks:

Different grade of heating panels can be provided, according to customer's requirements.

Notice: There are different colors for the case of the machine; you can select the one you prefer as long as we have them in stock. You can order the color of the machine, with a waiting time to get it completed. You can also customize the color of the machine with an extra cost and a large order.

Warranty and after-sales services
