Overview

Features:

- Adopt high quality spring steel material, good flexibility and wear resistance.
- High precision, tight and stable clamping.
- Work with 6mm collet, such as drills, boring knife, engraver, reamer etc.
- Help to adjust the shank of the CNC engraving bits from 6.35mm to 3.175mm.
- Outer Diameter: 6.35mm
- Inner Diameter: 3.175mm

Details:

Featured materials

Selected high-quality spring steel material, clamping and high elasticity.

Grinding polishing

Fine grinding process, size precision and high concentricity.

Processing

Reducing, conversion.

Used for

CNC engraving machine ER collet.

Applicable engraving machine and various collets, quick change shank diameter.

By heat treatment and precision grinding together, hardness can reach HRC62, more accurate, durable, high-quality, easy to use.

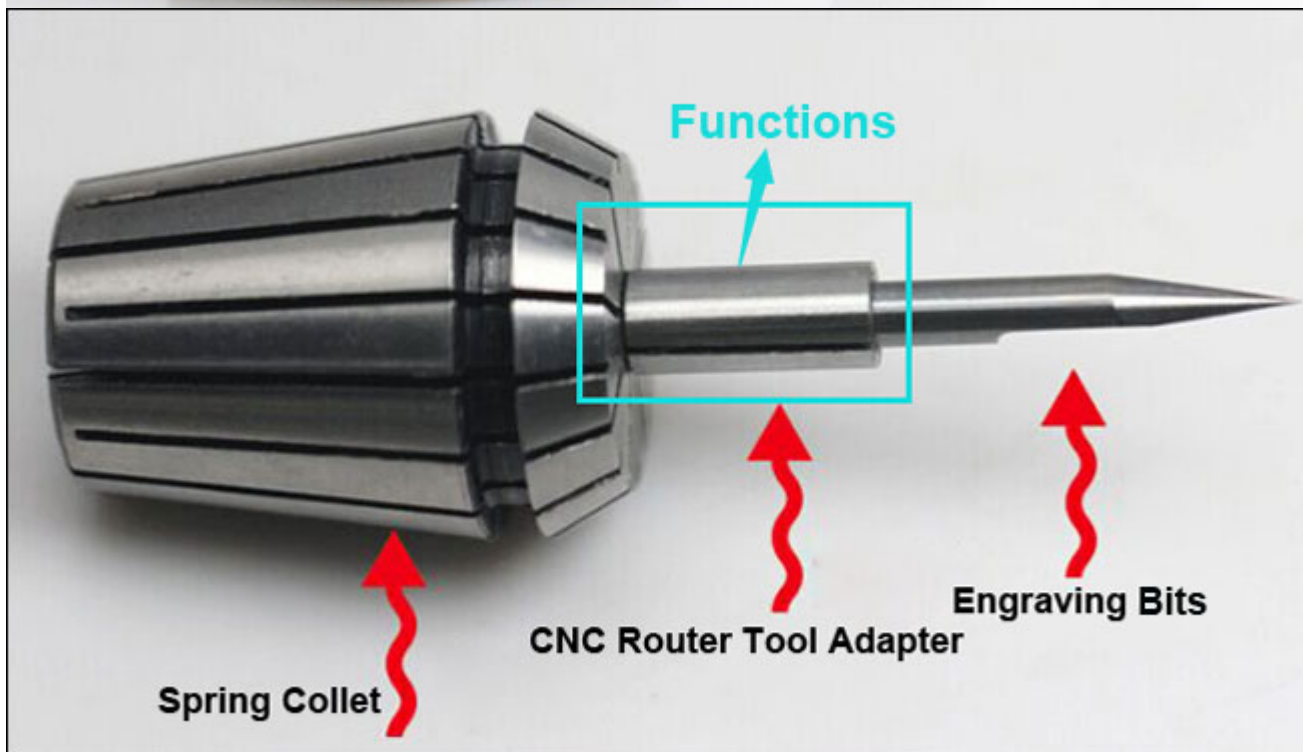

Usage:

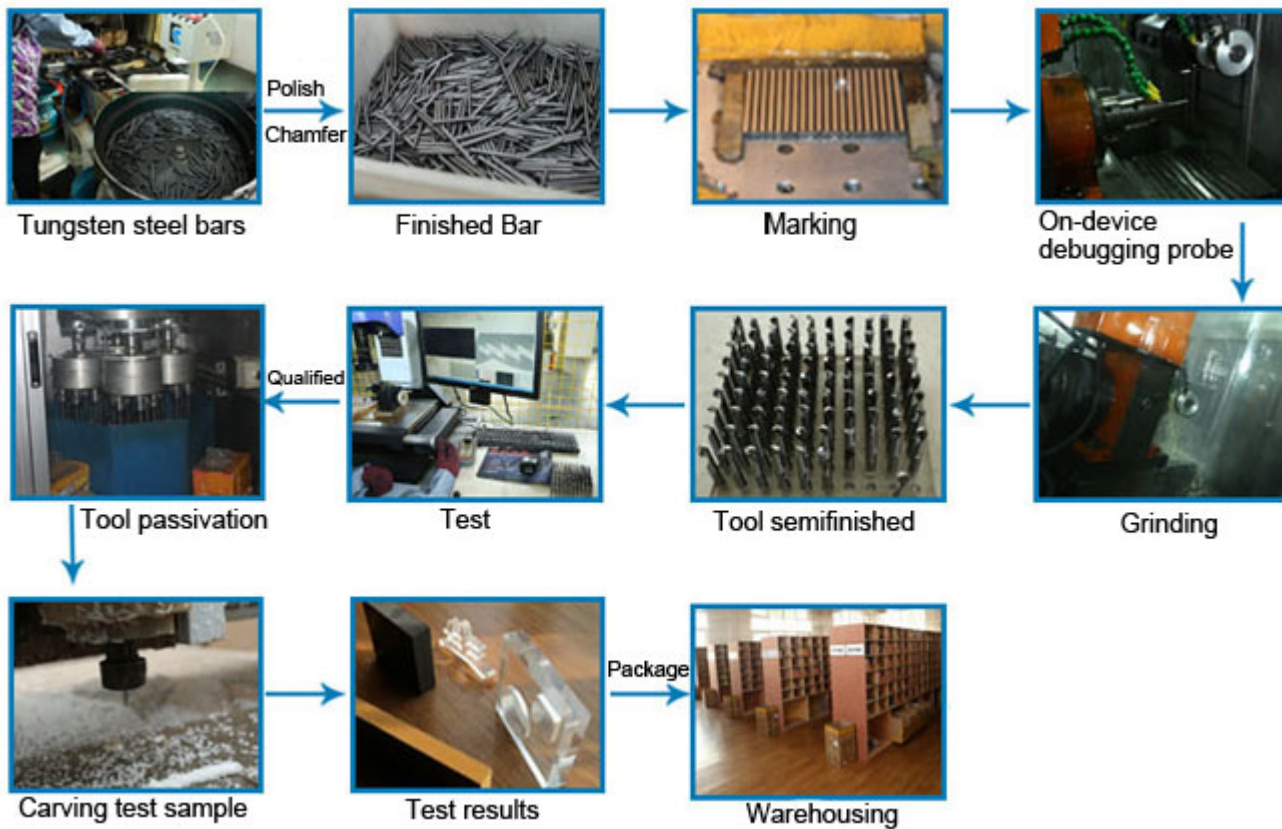

Spring Collets

Engraving Bits

**CNC Router
Tool Adapter**
