Overview

Descriptions:

The UV-640 can print white on a variety of clear media for text and graphics that stand out. The 64" UV-640 lets you explore a wide range of applications with just one device, from packaging prototypes and POP to wide-format signage and window displays.

Features:

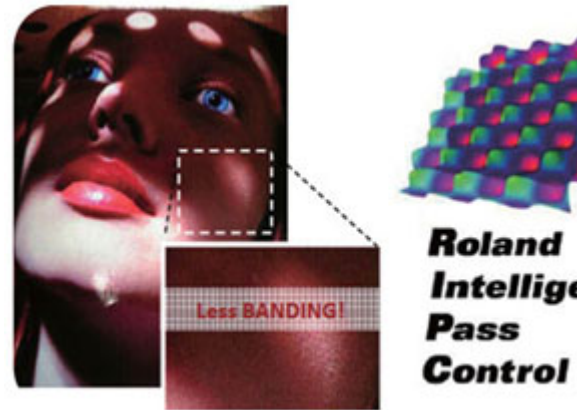

Reproduce every detail with the industry's most advanced print head

Roland UV-640 is equipped with the latest print head technology featuring all the detail in the graphic which is composed by 7 ink droplets in different sizes to accentuate all of the fine details in your image. The result is that the high-density printing effects with vibrant colors perfectly reproduces the original images in smooth gradations of colors and superb contrast.

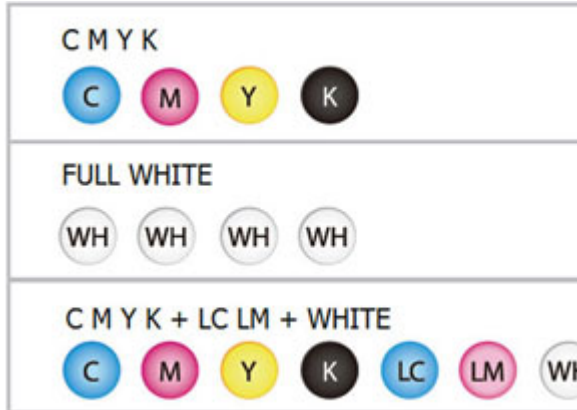

High productivity and exceptional print quality

Roland UV-640 is with Roland Intelligent Pass Control further enhances the image quality by precisely controlling dot placement between passes.

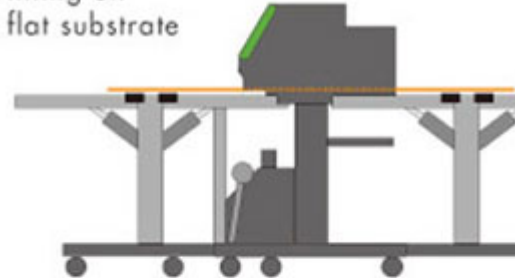

Optional for Three Modes of Ink Groups

Roland UV-640 is possible to equip "Four-Color Mode", "Seven-Color Mode" and the unique innovative "Full White Mode" for which it allows users to choose different ink solutions according to their need for printing.

Printing on
a flat substrate

Printing on
roll media

Supports Both Flexible Roll Media and Rigid Substrates

Having UV-640, the user can add a special platform that whatever thin media or thicker rigid substrate up to 2mm both are possible to print beautiful images and won't make the printing media distorted or damaged (the platform is optional).

Larger UV-LED Lamps Increase Productivity While Lowering Costs

The UV-640 features the newest generation UV-LED lamps, and the Lamp's Lifespan lasts up to 20,000 hours.

Automated maintenance features ensure print quality

An automated cleaning function keeps the print head in optimal condition, and ensures consistent ink jetting. It is equipped with a dual-wiping system, featuring a standard wiper and additional side wiper, which effectively removes dust and debris from the print head to reduce maintenance requirements. Meanwhile, a Jam Guard is included which protects the print head from media jams or collisions.

Application:

Leather digital printing(bags,footwear etc.),wallpaper,art painting(oil painting,painting frame),glass film,advertising light box.
