Overview

Features:

The human body is an infrared detection sensor switch controller, the use of infrared detection control the load of the switch. Users according to actual needs, the human body sensors installed in the appropriate environment 12V LED PIR switch.

Technical parameters:

Working temperature: -20 ~ 60 °C

Supply voltage: DC5V, 6V, 12V, 24V(optional)

Output: 1 channels

Sensing distance: 5 ~ 8 M.

Angle: 120 degrees.

External dimension: L89?W59?H35 mm

Packing size: L96?W64?H65 mm

Net weight: 80g

Gross weight: 100g

Static power consumption: <1W

Output current: <8A

Output power: 5v<40w , 6v<48w , 12v<96w , 24v<192w
