### Overview

#### Description:

This machine is a kind of most-advanced and high-efficient equipment researched and developed based on the advantages of similar machines in the world with full consideration for the actual situations in China. This machine may be used not only for transfer printing of uneven fabric cut pieces, but also for roll-to-roll printing. The use of adjustable pressure system brings effective solution to the dyeing miss problem caused by uneven fabrics and texture, which may result in texture at the fabric joints and make the color even brighter with its printing result same as that of plane transfer printing. And the use of guide belt type automatic rolling-up system makes the roll-to-roll printing more efficient with less use of manpower.

#### Characteristics:

1. Peripheral temperature rising is fast and heating is more even with oil-warming blanket;
2. The operation efficiency is 2-3 times than before;
3. Low noise and stable speed;
4. No cooling machine is needed and the blanket can be separated with the barrel;
5. The tension of the blanket can be adjusted more easily;
6. Convenient operation with power-failure protection function.
7. Frequency control speed.
8. Function of automatic cooling
9. Multi-functional for transfer printing of uneven fabric cut pieces and for roll-to-roll printing.
10. Available working width is 165 CM, suitable for printing of uneven fabric cut pieces and whole roll of fabric, etc.

#### Application:

CS-HTM-PDD-1700M suitable for printing on whole roll of fabric, seat pad, foot pad, back pad, sleeping bag, handicraft fan, umbrella and hanging painting, and all kinds of fabric can be also ironed, pressed and folded.

#### Specification:

Voltage(V): 380V 50 HZ 3-Phase 4-Wire System?  
Power(KW): 18  
Temperature(?): 0-250  
Working Size(cm): 186 x192 x100  
Diameter of roller(cm) : 42  
Available working width(cm): 165  
Packing Size(cm): 265x130x165  
Packing Weight(kg): 1500
