Overview

Description:

Raw material grade: Generally, there are four kinds of materials used for making cnc engraving and cutting tools, N/A/AA/AAA series, AAA series material is imported from Germany. so the bits abrasion resistance and break resistance are largely improved.

N--Chinese first-class solid carbide materials

A--Taiwan Chunbao tungsten steel material, HRC of material to be processed is 45

AA--German ultra-micron tungsten steel, HRC of material to be processed is 50

AAA--German the best material for making cnc engraving and cutting tools, HRC of material to be processed is 60

Good for: Low power spindle, high speed rotation above 15000 per minute processing.
