Q

I am looking for Polyester T-shirts that look and feel like cotton.

A	<p>Our t-shirts are made of pure cotton, pure polyester or cotton-polyester combined material. The last one means that the outer layer is polyester and the bottom layer cotton.</p> <p>Reply by sign-in-china</p>
Q	<p>Do you have distributors here in Manila that I can get in touch with?</p>
A	<p>Sorry ,right now we don't have any distributor in Manila .please contact with us directly .thank you .</p> <p>Reply by sign-in-china</p>
Q	<p>Hie, I want to by a printer and a press machine to run a medium size busines that deals with mugs plates tee shirts, can you suggest a printer and press that is suitable for this business,</p>
A	<p>Hi, for mugs, plates and polyester T-shirts, you need printer with Micro Piezo print head, a combo heat press machine, sublimation inks and papers, besides, mugs and plates should be coated for sublimation printing. If you mainly deal with garments, like t-shirts and cotton products, you may consider heat transfer vinyl, t-shirt heat press machine and one potter cutter. We can work with you to boom your business, thanks.</p> <p>Reply by sign-in-china</p>
Q	<p>What type of sublimation ink do you use to print onto 100% cotton t-shirt?Does ink require transfer paper or is it direct to t-shirt printer?</p>
A	<p>Hi, in order to achieve the best transferring effect and durability, we use pigment inks to be printed on T-shirt heat transfer paper, and then transfer the image by T-shirt heat press. Our T-shirt printer is another good choice for 100% cotton t-shirts. 100% cotton t-shirts cannot hold sublimation inks firmly, as a result, the image may not be very clear.</p> <p>Thanks</p> <p>Reply by sign-in-china</p>
