Overview

Patented Technology

Quick Easy Assembly

The company that has been known for innovation in design of tension fabric displays from the very beginning, introduces their latest breakthrough in LED light box technology.

The double-sided light box utilizes ultra bright LED light bars, which attach to the light box extrusion with simple thumb screws and plug together to create bright, even lighting out both sides, doubling your marketing messages.

Assembly is quick and easy and, because there are no bulky light panels, these light boxes break down and store in one case, offering considerable savings on shipping and drayage costs.

Demand for more custom sizes of product, you can upload your artwork or leave us a message first, we will contact you in 24 hours.
