QA

Q

Want to know the difference between the two 3.2 solvent printers pls, i.e- Konica 512

A

Hellow Fritz Tuiavii,thanks for your questions.Actually there are no much differences on the functions of the two printers.The only thing is 3.2m WC series machine is heavier than 3.2m LB series,when you print the heavy materials,the 3.2m WC series machine is more stable.Also the Motor and servo system of 3.2m WC series machine has better performance than 3.2m LB series,thanks.
