QA

Q

Is this a very common machine. Are there other people using this machine or is it something you have invented. If so, have you sold very many of them?

A

The crystal making machine is the common and mature machine, it is mainly used in the photo studio. We sold many all over the world; all our clients are satisfied with its quality.

Q

Do you need a special printer for this or is it printed on a normal inkjet?

A

It just needs the common desktop inkjet printer, such as the Epson desktop printer.

Q

I already have a UV bed. Do I just need the consumables then (paper, glue etc)?

A

If you already have a UV bed, you just need the consumables (crystal films, protect coating and glue)
