### Overview

#### 8x32 256 Pixels WS2812B LED Full Color Digital Flex Panel RGB Light Display Board 5V

##### Specification:

- 1, Model: WS2812-pixel screen
- 2, light source: SMD 5050 RGB
- 3, plate: soft copper
- 4, the chip: Taiwan Epistar chip
- 5, IC Model: WS2811
- 6, the gray level: 256
- 7, Beam Angle: 180°
- 8, Color: can be adjusted to the controller, white, red, yellow, blue, green, etc.
- 9, the standard operating voltage: DC 5V
- 10 Power: 0.3W ± 0.01%
- 11, Waterproof: not waterproof
- 12, FPCB board size: 10cm \*33cm
- 13, FPCB colors: black
- 14, our company can provide supporting Symphony controller and power supply

##### Description:

This product uses the world's first built-in driver IC series light-emitting beads as one of the main plus a WS2812 capacitor components. Panel looks very simple and beautiful, and the same WS2812 is also a very stable performance driven very high brightness lamp beads. With it out of the lamp beads, high brightness, stable performance, the board is simple, elegant, easy production, low cost, failure rate. Is the ideal choice of lighting design lighting outdoor lighting

##### Package Included:

1X Flex LED panel (without power and controller)
