Overview

Description:

Competitor print and cut material is not formulated for sublimated jerseys. What this means is that if you apply a regular printable polyurethane vinyl onto a sublimated garment, the sublimation inks will migrate – or bleed through the vinyl. ColorPrint™ Sublithin™ was specially formulated to work with most Eco-Solvent and Solvent based inks to block this dye migration and keep your graphics looking beautiful on any kind of sublimated polyester garment! Great for motocross, soccer and hockey jerseys with full sublimation.

Specification:

Width: 20" (50cm)

Length: 27yd (25m)

Time: 15 Seconds

Temperature: 266° F / 130° C

Pressure: Medium-Firm (3 / 4 bar)

Average thickness: 110 micron

Recommened cutting pressure: 80gf

Blade: New at 50°

Peel: Warm

Application:

- 100% Cotton.
- 100% Polyester, Elastan.
- Polyester fabrics dyed with sublimation ink.
