

Item Code: SIR-DCM-1725

?????? ?????????: ?????, ?????????, ?????, ????, ????????? ? ??.

Intelligent safety device, ensure the safety of operating personnel.

Intelligent camera positioning system

Intelligent cutter tools combination, which considerably increases production efficiency

Professional design software to identify the outline of cutting contour automatically, and the auto nesting system, save your time to design cutting files.

Honeycomb board of aluminum is used as the machine bed. The surface on honeycomb board of aluminum is made of aluminum alloy spraying fluorine charcoal. The center is the core of honeycomb board meeting with the international standard of aviation material.

Customized cutting size is acceptable

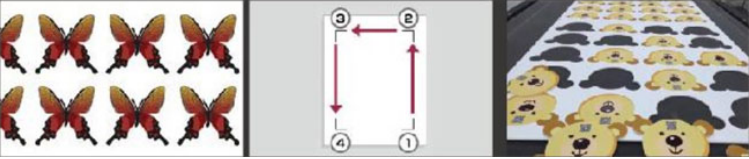

Intelligent systems and control continuous cutting highly improve working efficiency

Optional Tools:
