3-SMD 5050 RGB Non Water Proof Module 80x14mm

Item Code: LED module-LBY-5F12T8014-3RGBNWF

FOB Price:	**$0.98/pc**
Mini Order:	200 pcs
Average Rating:	lb (kg)

[Inquire Now](#)

Overview

Characteristics:
. High brightness LED SMD as a lamp-house, with wide angle view and a small aperture.
. Controlled by the chips with constant current, has a steady current between the cathode and the anode.
. Low voltage, safe, and gearless.
. With a settled orifice and 3M gummed paper, very convenient to install.
. Longlife above 80,000hrs.
. Low power consumption, energy conservation and made for save electricity.

Usage:
LED SMD modules are widely used for solid lighting character, LED signs, LED lighting box, scenery designs and decoration, etc.

Sample:

Details

Material	Plastic
LED Number	3
SMD Package Model	5050
Color	RGB
Shape	Rectangular
Brightness	Medium

Specifications

		Basic parameter		
Color	Red yellow blue green white		LED type	5050 SMD
LED quantity	3PCS		Demension	3.1"*0.6"*0.2" (80*14*6mm)
Module interface	Yellow/Red/Green/Blue 0.2"*0.02" (4*0.5mm) 0.1"*2.4" (2*60mm)RVleads		Interface definition	Yellow anode,Red/Green/Blue cathode
Cluster quantity	20pcs		Module space between	2.4" (60mm)±5%

Weight	0.4oz (10g)±5%	Lifetime	MTBF>50000hours
	Enviroment parameter		
Working temperature	-40°C?60°C		
Outdoor level	IP65 completely satisfied the outdoor lighting standard		
	Electronic specification		
Input voltage	D12V±5%	Max power	0.63 W
Driving mode	Invariablenes Voltage (Insure every LED working under the invariablenes voltage)		
	Lighting capability		
Luminous flux	1.9floz (54lm)		
Beam angle	>110°
