QA

Q

About the cylinder rotary fixture, does it works for wine bottles for example?? because it says that the diameter is from `0` to 150 mm, and the bottles have a bigger diameter, I don't need to engrave all the surface around, just a part of it.

A

The rotary fixture can work on wine bottle, but no matter how much area you engrave, the max. diameter of wine bottle should be within 150mm.

Q

The machine already comes with a glass tube. reflective mirror and focus lens, isn't it?? apart from `the` listed items I ask as spare parts?

A

Yes, you are right. There is glass tube, reflective mirror and focus mirror with the machine already. But these parts are consumable parts, you can take them with the machine as spare parts for future use.
