Overview

This is a backlit pet film especially for indoor water-based ink. Since we adopted the nanotechnology and selected the transparent PET, the material is shape-keeping. The transmission is even and soft. Appearance of picture is fine and smooth. Colors are bright. Therefore it's widely used for indoor & outdoor light boxes, show windows, and manufacturing of background in studios.

Attentions:

- . Mirror image is needed to ensure correct input when printing.
- . Since high-tech coating is adopted, please increase the ink supply amount so as to acquire good effects of pictures.
- . Please do not expose the unpacked products to hot and humid environment so as to avoid influence on the blotting speed.
- . Cotton gloves are requested when touching or printing the pictures in case of any punctures.

Suitable inkjet printers:

Suitable inks:

Mutoh, Roland, HP, Epson,
Mimaki, etc.

Dye ink.
