Overview

Description:

This removable glue technology is a kind of new bionic viscose, the inspiration is from `gecko` foot's spatula, around 10,000 spatulas per square centimeter, the diameter of spatula is around 5—60 micron. It is 100% environment friendly, and 100% removable, can be reused.

Till now, we have SGS certification.

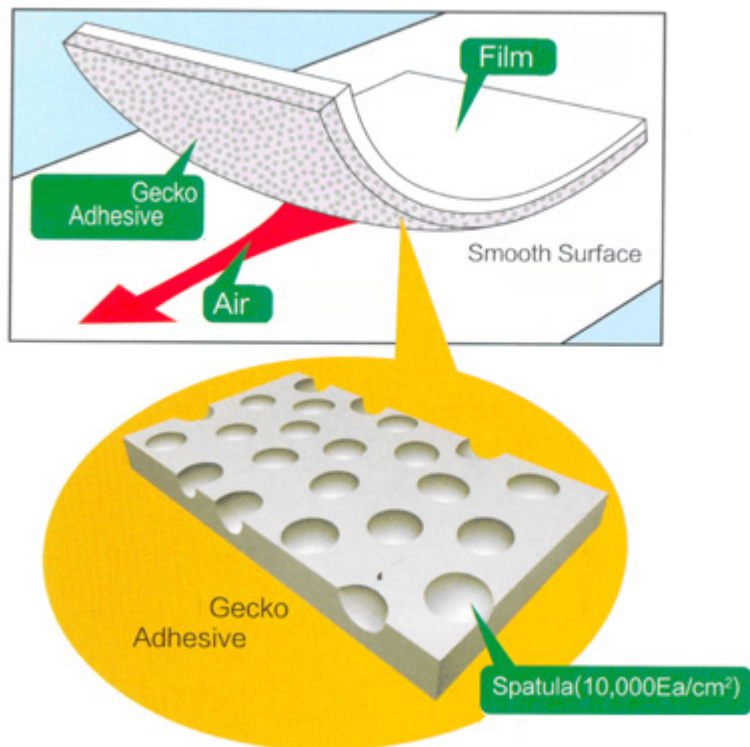

Product Structure:

PET Film(70mic, black coating) + glue(80mic, removable) + back paper(75mic pet film)

Features:

Comparing with traditional PVC one-way-vision vinyl, this removable PET one-way-vision vinyl (with printable glue), is environment friendly, and durable. For our vinyl is printed on glue, we can stick to window inside, and it avoids high buliding working outside. Also, it avoids the damage from `sunshine` and rain.

Size available:

Width: 36.0" (0.914m), 41.7" (1.06m), 50.0" (1.27m), 53.9" (1.37m), 59.8" (1.52m)

Length: 164.0' (50m)

Suitable machine:

All solvent and eco-solvent machine, such as: Roalnd, Mimaki, DGI and others.

Usage:

For our PET film, one side is coated with black color(this side is backside, no printing), the other side is white with glue, and we print on it. When finished the printing, it can be rolled up.

Application:

Widely used in high buliding windows, shopwindow decoration, and bus, subway advertisement, and other places.
