Overview

Semi - auto cold laminating machine (Automatic take - up rolls of back paper), with functions of single sided cold laminating and

mounting by electric

This Laminator is a great add - on to any sign shops that need a Professional Cold Laminator for various sign making needs. Easy to use and Guarantee a quality result each time. Good color reducibility and light transmittance, free of bubbles and snowflake point! It saves manpower and is easy to operate. A perfect fit for entry level customer, who is looking for an affordable and professional cold laminator for their projects. This new model can be widely used for pre - masking vinyl graphic, mount prints on substrate, over laminating inkjet prints and so on.

Features:

- Great for mounting prints to boards
- Over laminating digital prints
- Applying application tapes, applying double side adhesives and vinyl
- Solid built, laser - cut steel structure
- Free heavy duty floor stand with caster wheels
- 3" core auto - grip rollers for easy laminating film setup
- 5" bigger rollers for best quality laminating control
- Easy operation panel: Forward, Backward, Foot Pedal Control and various speed adjustments, Emergency Stop Button.
- Removable front worktable for easy film setup
- FMJ-1300-II plus is based on the theory of FMJ-1300-CIIZ, because we have the profound understanding of principle of laminator so a simple new laminator which is auto stripping and collecting back paper is developed.
- It has simple structure, reasonable, humane and low cost characteristics.
- Adopt new - style aluminum alloy supporting roller.
- The laminating - supporting roller and stripping roller are equipped with forelocks associating with standard 3 - inch paper rolls.
- It saves manpower and is easy to operate. As a result of the novel structure it has been a good market since its appearance.
- Since it was produced; it has been popular at the roller for supporting film, guiding roller and roller for collecting liner paper.
- It is operated conveniently and high efficiently - It realizes continuous laminating and longer picture laminating. Realize automatically stripping film and collecting liner paper through the rotary force of the upper and lower roller.

How to laminate the long pictures?

How to laminate the short pictures?

How to mount the board?

Comparison:

Appearance: Take reasonable money to buy the suitable machines

Our Machine: Appearance design of FMJ-1300-II plus semi - auto cold laminating machine has novel, simple and reasonable structure, humane and low cost characteristics.

The Other Machine: The top right side machine's appearance design is too thin, and it is easy to damage, and it has many questions if you buy.

Textile of rollers:

Our Machine: Adopt high quality diameter 128 mm (5") acrylonitrile butadiene rubber rollers, which can control the quality laminating very well. At the between upper and lower roller the picture laminated is the straight-line movement of internal forces. It saves manpower and is easy to operate.

The Other Machine: The common cold laminator machine adopts normal rubber roller, and up and down roller's thickness is not the same that will affect the laminating effect and machine's using life.

Textile of rollers: for supporting film, for supporting picture, for collecting liner paper

Adopts new - style aluminum alloy supporting roller, which is easy to assemble / disassemble and can be used in exchange. The collecting rollers are dynamical rollers and the supporting rollers are without dynamic. All of the rollers are equipped with damp devices and are eligible for speed adjustment.

Why buy this semi - auto cold laminator?

Laminating is a low cost way to protect and preserve everything from ID cards to restaurant menus. But did you know lamination does more than just protect? And that it protects in ways you may not have considered.

Lamination Preserves & Protects:

Here are a few ways lamination protects your materials, with an example of each:

Protects from spills: Sales presentation materials

Protects from rain: Little League team roster

Protects from grease and chemicals: Maintenance check list

Protects from smudges & fingerprints: menus

Protects from abrasion: Instructional materials

Protects from the sun: outdoor directional signs

Protects from creases and wrinkles: sales promotion material

Lamination provides low - cost long - term protection without the need for climate control or other special protective measures.

Lamination Improves Appearance:

Lamination improves the appearance of your materials in a variety of ways. For example, lamination:

Deeper and brightens colors; Enhances contrast; Dirt, grease and smudges can be cleaned off; Gloss, matte or satin finishes are available; Lamination gives your materials a finished, professional look of quality. Materials that are laminated just look better!

Lamination Can Improve Sales / Save Money:

By giving your materials a higher quality, professional look, lamination can improve your business image and help bring in more sales leads. Lamination can also save you money in a variety of ways, such as:

Laminated materials can be reused over and over

Expensive graphics are protected

Lamination stiffens signs and posters (additional backing is not needed)

Employees have proper identification helping to save time and reduce accidents.

You can make low-cost signs that resist weather

Lamination provides a durable way to protect and enhance almost any type of printed material. It improves the quality of materials by enhancing color and contrast, and providing a glossy "wet" look.

Application

The cold laminator is used for after printing. Available for photographic, Ad. Shop and copy shop to do lamination work, adding a protective layer on books cover, photographic, color pages, documents, charts, drawings, indoor advertising products, etc.

Brighten Your Graphics
Decorate Your Life!

The collage features six square panels arranged in two rows of three. The top row includes a ballerina in a white tutu, a heart shape, and a branch with red fruit. The bottom row includes two panels of purple flowers and one panel of a purple flower. The background is a bright blue sky with a large red roller machine in the top right corner.
