### Overview

- An easy to use, entry level, banner stand
- No loose tools or parts to lose
- Graphics attach using eyelets, making it ideal for PVC and fabric banner
- Weight: 0.9kg

If you need a low-cost, lightweight banner system, L-banner is the answer. This easy-to-assemble system is the perfect solution for many banner projects.

The graphic (not included) is held in place between the base and the top by a tensioned support pole. This semi-permanent product displays well in an office or a retail location. Instructions for graphic installation and assembly are included. 24" and 27" widths can be used with vinyl or fabric banners, but a 36" width will not hold a vinyl banner; it is therefore recommended to be used with fabric banners only.

The L-banner will not support the weight of any kind of light.

**Application:**

Great for presentations, trade shows, seminars, training, etc.
