### Overview

- **Portable**
- **Lightweight and easy to carry**
- **Easy to fix with a four day lead time**
- **Material: aluminum-alloy**

This X banner stand is one of our largest portable banner stands. Also known as a banner display, it can display a printed banner up to 60cm wide and 180cm tall.

Retractable banner stands, pole banners and other X banner stands with the same size graphic usually weigh much more than this lightweight and reliable banner display. Constructed from lightweight aluminum with plastic connectors and composite arms, this banner display weighs practically nothing for its size.

An X banner stand shaped like a pole banner display or a spring back display stand, has the advantage of simplicity over retractable banner stands.

This stand has very few moving parts, making it considerably less complex than a retractable banner stand.

Like many of our other banner display stands and retractable banner systems, this product includes a custom printed banner. We use the users' artworks to print the banner display, so they have full control over the design. The durable vinyl and eco solvent-based inks create a durable print that is not affected by moisture and can be used repeatedly.

This X banner stand can be set up in a few minutes. Due to its size, though, setup may be easier when performed by two people.

**Application:** For indoor use, such as exhibitions, conventions and other trade shows.
