### Overview

- Europe design style, stable and solid
- Picture flat and smooth
- Doesn't tilt when several single units are used together
- Once you buy it, would not gonna stop using it.

This poster stand has 4.4kg steel base that is very stable and durable. Its telescopic pole is made of thickened aluminum and can hold 10kg weight, without sliding or distortion.

Its parts are made of special ABS, not easily to break and the profile is made of total aluminum. It is a clip rod.

This design makes the picture tight and flat; you could combine single units to make a large format without limits by our connector, a good replacement of pop up display.

Application:

Fit for all kinds of exhibitions.
