### **Overview**

#### **Description:**

The Large Format Roll to Roll Heat Transfer Machine 1700 (oil-warming machine) is the new type of heat transfer equipment, it fully represents the advantage of the speed and good effect in transfer printing. It adopts the oil heating mode to control the temperature, achieving speed in warming and good effect in the heat preservation, as well as improving the productivity. In addition, it has functions such as automatic blanket off, automatic lifting off backing paper and automatic rolling picture etc. The equipment, through a series of human-based innovation design, makes your work safer and easier.

#### **Characteristics:**

- Peripheral temperature rising is fast, heating is more even and good effect in the heat preservation;
- Roll to Roll transfer;
- Automatic blanket off, Automatic lifting off backing paper and Automatic rolling picture;
- Low noise and stable speed;
- No cooling machine is needed and the blanket can be separated with the barrel;
- The tension of the blanket can be adjusted much easily;
- Convenient operation with power-failure protection function.

#### **Application:**

Suitable for printing on whole roll of fabric, seat pad, back pad, sleeping bag, handicraft fan, umbrella and hanging painting, and all kinds of fabric can be also ironed, pressed and folded.
