Overview

- Concise appearance, elegant frame and small space occupation
- Lightweight and portable to carry
- Made of Aluminum
- Banner is vertical and does not lean back
- Four (4) Days Lead Time

This aluminum x banner display is ideal for indoor advertising. Unlike other banner display stands such as portable display systems and retractable banner stands, the tripod banner display is very lightweight and holds the vinyl banner vertical. We offer this tripod banner display because it is lightweight, inexpensive and does not tilt back like other banner display stands.

Banner display stands that tilt back toward the top do not have the same effect as a perfectly vertical banner. Banner stands that hold the printed banners perfectly vertically have a stronger presence than those that tilt back.

This banner display is constructed from `lightweight` aluminum with plastic connectors. This makes it very lightweight and inexpensive; the majority of the cost comes from `the` included full color custom vinyl banner.

This banner display like our other banner displays and retractable banner stands comes complete with a custom printed banner. We create the custom printed banner from `your` artwork so you control what is on the vinyl banner.

Application:

For indoor advertising and other promotional activities.
