Overview

Main Function: Scan/engrave/cut

Application:

Mainly used for stamp carving store and Ad. shop. The [laser stamp engraver](#) uses a beam of light as the engraving tool, so no part of the machinery actually touches the material being engraved. You don't need a special system to hold your engraving material.

Materials that can be engraved:

Engraving stamps: Horn, organic glass, atom, plastic and rubber stamps.

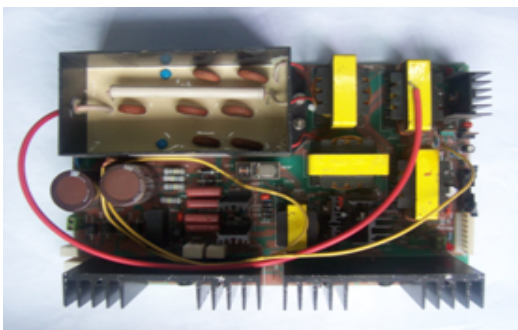

Engraving graphs: Engraving name, specification, type and other words or graphs on double color board, sign plate and all other kinds of small format handicraft or sign plate materials.

Products Highlights:

.Support gradient carving, cutting and engraving output at the same time. The engraved words and graphs do not fade, exist permanently and can avoid being forged effectively.

.Power Source is the core technology, this [laser engraver](#) adopts original alterable internal resistance mode instead of traditional PWM pulse width modulation mode.

.New power source mode has more powerful internal resistance, higher stability and higher reliability, which can raise good ballast effect.

Power Source

Note: If you want to do simple engraving work, especially for stamp carving, and your engraving area is within (240 x 250mm)(9.45" x 9.8"), you can choose this Mini. laser engraver.

Spare Parts:

Glass laser tube 40W: +\$268

Reflective mirror: +\$10

Focus lens : +\$90

Guarantee & Aftersales Service:

Laser tube 2000 hours' working time

Comprehensive guarantee for one year except the spare parts

24-hour technical support by email or calling

User-friendly English manual for machine using and maintaining
