Overview

Application:

The CW-5000AG circulating cooling machine is designed to cool the laser tube of the laser engraver and cutting machine.

Remarks:

- . The cooling machine suitable for cutting double laser tubes, which are under the 150W and the temperature can be precisely adjusted.
- . The voltage is AC220~240V, and the frequency is 50Hz.
- . The laser tube has a long lifespan that ensures a better effect on the engrave process.

Details

Main Application	cooling
------------------	---------

Specifications

Specification:

Model	CW-5000AG
Voltage	AC220~240V
Frequency	50Hz

Current	1.4?2.1A
Cooling Capacity	2361Btu/h
Refrigerants	R-134a
Charge Amount	338g
Max. Pump Lift	10M
Machine Dimension	55x28x43 cm
Machine Weight	31Kg
Package	Fumigation free case package
Package Size	72x44x62 cm
Gross Weight	36kg
