Cutter for Heat Transfer Fiber

Item Code: CS-C-FI

FOB Price: **\$65.14/pc**

Mini Order: 5 packs

Average Rating: 1b (kg)

[Inquire Now](#)

Overview

Description:

This cutter is used to cut textiles by electrical heating the cutter blade, which is suitable for the chemical fibers, but not for those products including PVC, like PVC flex banner.

Application:

Mainly used for the cutting of the heat transferred cloth.

Note:

.This cutter is expendable and consumable, and thus the warranty of the machine is 6 months, and the guarantee period of the power is 3 months.

.When using, you'd better not make it work for long time, or it would break down because of over heating. A better way is to stop it for 5 to 10 minutes after one hour's working to cool down the machine before reusing.

.If the cutting edge is blunt, you should rub it with sandpaper before using..

.As this cutter is a high-powered one, you'd better not plug it with other devices into `one` electric outlet for safe.
