Overview

Description:

- Placed in front of the printing machine to dry graphics.
- Hot-wind dryer with a more ergonomic design, with adjustable temperature and controllable tuyere. Oblique design on both sides so the hot wind can go through the air outlet and avoid a radiating surface. Fast drying is achieved faster by installing it on the stand.

Characteristics:

- Operating principle: hot air-drying ink on printed media.
- Main functions: Ink drying after graphic is printed
- Switch control: Adjustable temperature, independent switch control in the Tuyere, temperature detection with Twinkle frequency.

Compatible Models: to be used with any model.

Application:

- To be used with water-based and Eco-solvent ink printers.
