Comparison

Our products

Our Cartridges with large capacity 300 ml are more

[Other brands]

Inconvenient supply of ink because of using syringes

Cartridges get dirtied by directly filling ink

Cartridges with capacity 110 or 220 ml need to be changed frequently.

Application
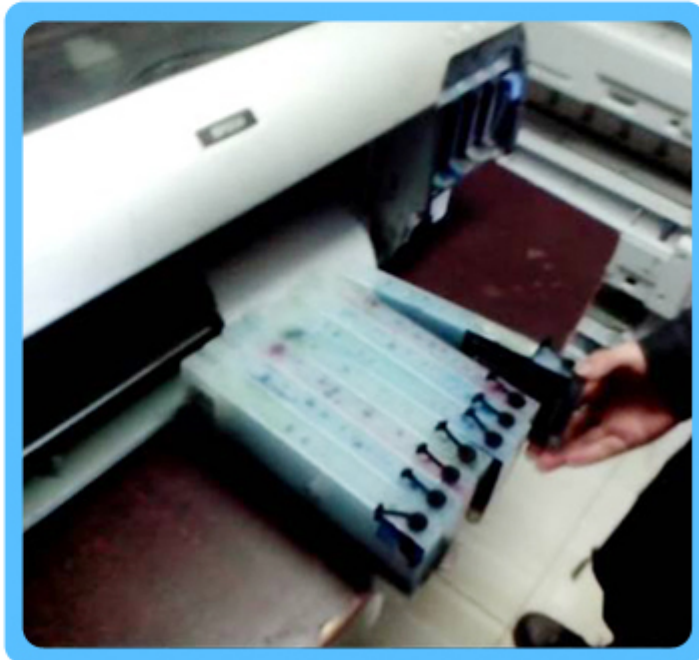

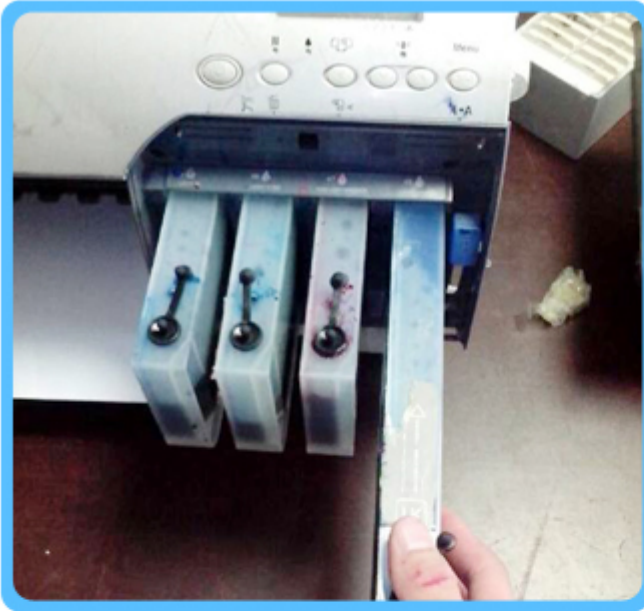

Cartridge installation steps

1

Lift the cartridge lock and remove the cartridge.

2

Fill ink into cartridges

3

One by one insert the refilled cartridges back to original positions on the machine according to color sequence.

4

Relock cartridge

How to reset cartridge chips

Using the decoder:
remove the cartridge when the chip alarms that the ink is used up; keep the contact point of the decoder touching at the chip surface of the ink cartridge; when the red light of decoder becomes yellow, the decoding has been finished.

EPSON 9880/7880/4880 etc. Cartridge Chip Usage Instruction

Our chips on the cartridges can be used on Epson Stylus Pro 7600/ 9600/ 4000/ 4400/ 4450/4800/ 4880. Our special software makes the chips compatible for all work of the above Epson printers.

Please do as follows when using the chip:
• The printer shows NON-GENUINE when you install the cartridge, now please press direction keys on the panel ?????, to choose ACPT

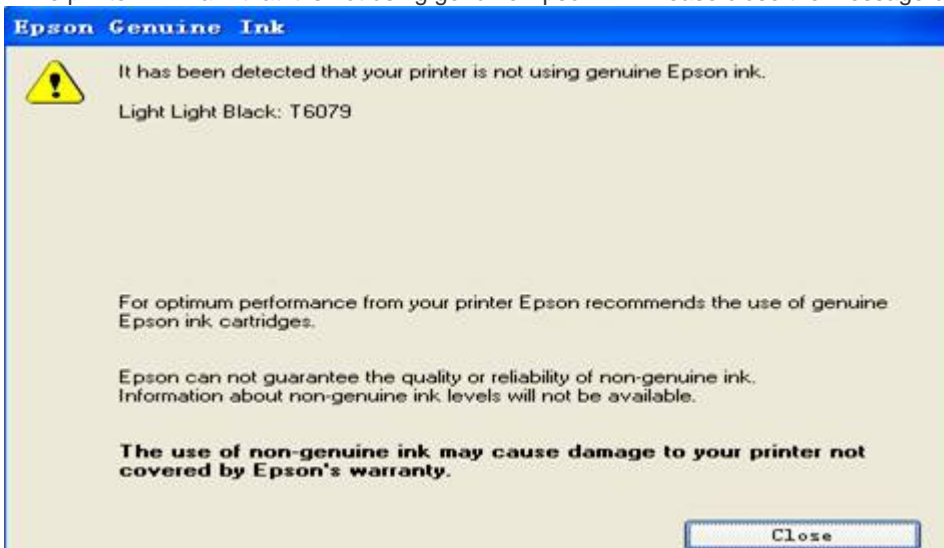

• Afterabove operation, printer will do the cleaning and recognize these chips. Theprinter screen shows READY. The cartridge is empty and the ink capacity incomputer drive software is grey.

• The printer will warn that it is not using genuine Epson ink. Please close the message box and then the printer can begin work.

• The chip will not indicate the real-time ink consumption. When it runs to the assumed ink limit, the relative Ink-out area blinks and the panel shows REPLACE INK CRTG. A chip resetter is needed to make the chip reuse.
