Overview

Description:

There are two kinds of Polycarbonate(PC) boards: the solid one is called solid board, and the hollow one is called hollow board or sunshine board.

These solid boards which is a new type of high-strength, heat insulation, pass through light, portable building materials, have been widely used in the production of light, carport lighting, road barrier, explosion-proof shields, the sky lighting, industrial plants, greenhouse, the observation window, the sound of Barriers, lighting exhibition and so on.

The surface of this kind of board is frosted.

Applications:

Bathroom, upholster, lighting, indoor partition, folding screen, all kinds of sunshades, ceiling, LED displays, various non-reflective equipments' surface, various frosted effect equipments' surface, etc.

Remark: Color and size can be custom-made.

Note:

The quotation of the product we give is based on one millimeter thickness, if other thickness is needed, please multiply the quotation by the corresponding thickness that you want.

Specifications				
Standard thickness	weight	Standard width	Standard length	Standard color
0.0585" (1.5mm)	3.9" (100mm)	48.0" (1220mm), 61.4" (1560mm), 71.7" (1820mm), 82.7" (2100mm), 98.4" (2500mm)	236.2" (6000mm)	Clear, green, blue, smoke, brown, opal, red, silver
