Overview

Description:

Ink Vacuum is specifically designed for cleaning printer nozzles by using a vacuum absorbing function. It consists of an ink absorbing motor at the top, filter in the middle, and an ink-storage at the bottom.

Features:

- . Specially designed disposable filter element, mounted between motor and waste ink tank, to prevent motor pollution.
- . Anti-corrosive structure for a longer lifespan.

Applications:

Ink vacuum is used to avoid blockage of the inkjet printhead by will absorbing ink waste.

Remark:

1200 B type has larger diameter and the ink-storing tank is larger, which is ?450mm.
