Description:

- . Mirror ACP is a panel with two aluminum sheets and a PE core.
- . Mirror ACP is has the mirror-like surface, thus it is more attractive and quite suitable for advertising or signage.
- . Mirror ACP is easy to be cut, punched; it has great feasibility on processing, easy to be fixed to all claddings, including all shapes, angles, curves, radius, bending, joint, connection, etc. It can be finished by normal machines for metal and wood.
- . Mirror ACP paint performance is according to ECCA standards, 5 years guarantee on PE coating, 10 years on FEVE coating. It is processed by UV ray and high temperature baking, so it has higher hardness and has better property in rub-resistance.
- . It is light weight with surprising rigidity, thus it is the best choice for advertising.
- . Mirror ACP can be bent or curved by normal roller or bending machine, also could be customized.

Specification:

Aluminum Thickness(front side and back side): 0.01"/0.01" (0.30/0.30mm)

Core: PE

Surface: Silver mirror

Panel Thickness: 0.1" (3mm)

Standard Width:48.0" (1220mm)

Standard Length: 96.1" (2440mm)

Application:

It is widely used in advertising, signage, engraving, etc. Such as ads show, convention centers, art buildings, highgrade building walls, star-rated hotels, airports, gas stations, etc.
