### Overview

- . SMD LED lighting for long life-span.
- . Multi-pictures, four pictures for catching peoples' eyes.
- . Adopting superior lighting panel, imported acrylic mirror or mineral coating glass mirror.
- . 70%-80% energy saving than the traditional light box
- . Control on/off by infrared ray sensor, when people approach, it displays a mirror, when people away, it displays a picture.
- . Light is soft and mild, even brightness, which is very comfortable for eyes.

#### Description:

Multi-graphic crystal magic mirror light box is fixed with a sensitive sensor which is responsive. There are four pictures in one light box and showing turn by turn or just like a flash, but when people approach, all the graphics will be off or except 1 pc, and it displays a mirror, when people go away, it displays graphics as a light box. The flash effect can be designed by client. It's widely used in different places, such as hotel, shopping mall, airport, house, school, etc.

#### Remarks:

The overall Image size needs to be larger than the viewing size, in order to have a perfect fit and a great view of the image. That goes for all A1-A4 models.
