X pop up display--A changeable shelf

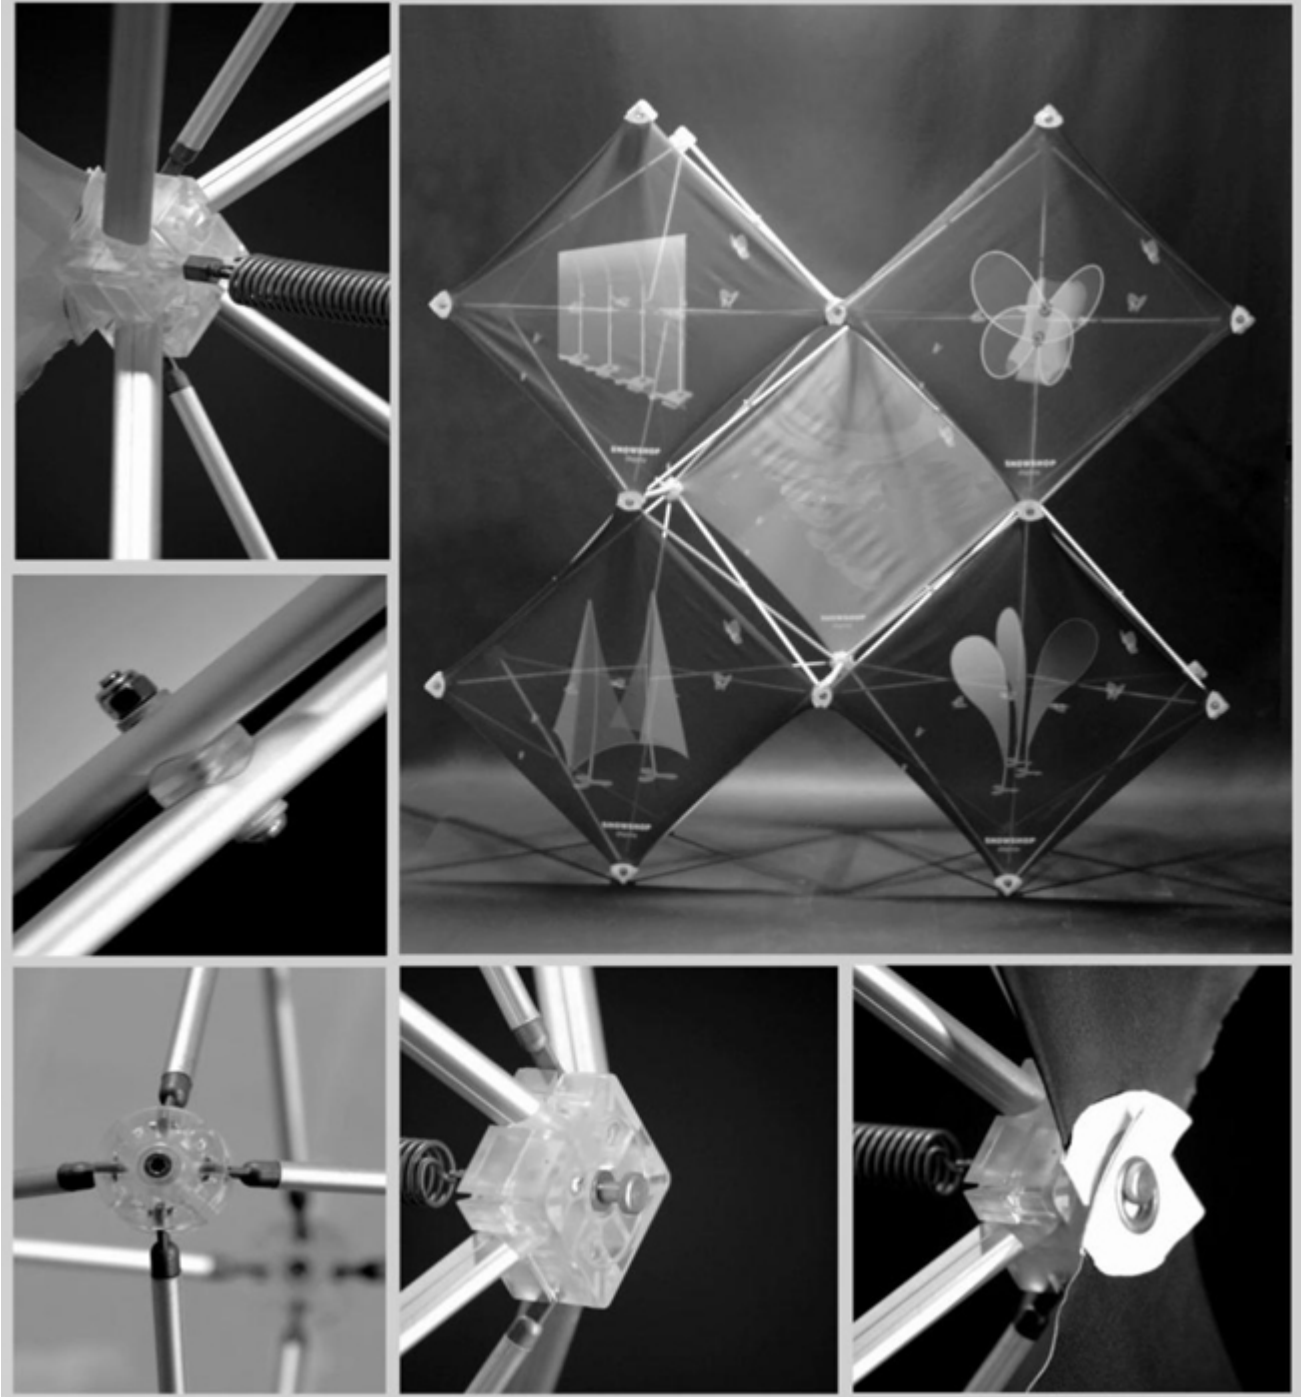

There are many changes happening in every branch and customer's demand within a short time,so our products also should be changed according to our customers.

X pop up display gets the final customer's approval according to unaltered structure and the ever-changing display and frame. Not only use the popular novjet shell fabric, but also it can choose the most fashionable international environment fabric in the world. It is easy to handle. The alloy of aluminum&magnesium and zinc make the shelf more difficult to damage. Bevel balance design makes it stabilization.

Create a lasting impression on your customers with custom images that literally pop out of your display.

This pop up display comes with nine square fabric panels that are printed using a 4-color dye-sublimation process. Use your creativity and have them printed with whatever you'd like! Each printed fabric panel is pre-buttoned onto the aluminum frame, yet is easy to remove if necessary. The fabric panels attach to both planes of the frame and stretch out as the display is opened. This creates the stunning, 3-D effect. Each fabric panel is also wrinkle resistant, machine washable, and flame retardant to comply with fire codes.

Application:
Suitable for all kinds of exhibitions.
