

## Pin button making

A. Put the upper shell, background paper and the mylar disk in order in the left mold.

B. Put the pin back in the right mold (adding the metal ring when the pin back is metal)

C. hold the button making machine and press the handle

D. raise handle, put the down mold to left. You could see the upper shell, background, mylar have been adsorbed into upper mold.

E. hold the button making machine and press the handle

F. raise handle. Put the down mold to right. Button finished.

### Tips:

- Push the bottom mold left to right, make the left mold and the upper one face to face.
- Hold the machine and press the handle.
- Push the button out by right hand.
