

Code: FMJ-650-II-PLUS

Name: 26" Semi - auto 26" Small Home electric Business Card Cold Laminating Machine

Overview	Specifications	Packing list	Warranty	Video & samples
----------	----------------	--------------	----------	-----------------

Semi - auto cold laminating machine (Automatic take - up rolls of back paper), with functions of single sided cold laminating and mounting by electric

Table Top Model, driven by electric or by hand (For option)

No need to heat, no auto rewind shafts

Good color reducibility and light transmittance, free of bubbles and snowflake point!

A perfect fit for entry level customer, who is looking for an affordable and professional cold laminator for their projects.

This new model can be widely used for pre-masking vinyl graphic, mount prints on substrate, over laminating inkjet prints and so on.

Easy to use and Guarantee a quality result each time.

FMJ-650-II-PLUS is upgraded from FMJ-650-II, it has all functional characteristics of FMJ-650-II, and comes with support shaft for manually rewinding the backing paper in some projects.

Features

- The mounting master 26" is motorized table top laminators. Simple structure, portable machine.
- It comes with foot pedal with forward and reverse control to free your both hands from handling the work being processed.
- The easy speed control makes your daily job more handily; laminating speed can be easily adjusted from 0-3m (118") / min.
- This model is designed for mounting and laminating inkjet prints, but is equally capable of handling photographic or any printed media.
- 1" core auto - grip rollers for easy laminating film setup
- 65mm (2.6") bigger rollers for best quality laminating control
- It has simple structure, reasonable, humane and low cost characteristics.
- It is operated conveniently. Applying application tapes, applying double side adhesives and vinyl

Details

High quality Butadiene acrylonitrile rubber roller, 65mm (2.6 inch diameter)
Generally speaking, the lifespan of a roller is about 4-5 years or longer. The roller is the key component of a laminator and it directly affects the quality of lamination, so it is crucial to give good care and maintenance to the roller.

Working table with ruler, this machine's table is very even. The feed table is more stable, and the laminating effective is better.

Comparison

VS

Function

FMJ-650-II-PLUS is semi – auto cold laminator (Automatic take - up rolls of liner paper, without take – up roller for after lamination prints).

FMJ-650-II is common manual and electrical cold laminator, cannot take up the liner paper mechanically.

VS

Appearance - Take reasonable money to buy the suitable machines

Our Machine: Appearance design of FMJ-650-II-PLUS cold laminating machine has novel, simple and reasonable structure, humane and low cost characteristics.

The other machine: The top right side machine's appearance design is too thin, and it is easy to damage, and it has many questions if you buy.

Material of rollers

FMJ-650-II-PLUS Adopts high quality diameter 65 mm (2.6") acrylonitrile butadiene original rubber rollers, which can control the quality laminating very well. At the between upper and lower roller the picture laminated is the straight-line movement of internal forces. It saves manpower and is easy to operate.

The common cold laminator machine adopts recycled rubber roller, and up and down roller's thickness is not the same that will affect the laminating effect and machine's using life.

Usages

Applications

This new model can be widely used for pre - masking vinyl graphic, mount prints on substrate, over laminating inkjet prints and so on.

The cold laminator is used for after printing. Available for photographic, Ad. Shop and copy shop to do lamination work, adding a protective layer on books cover, photographic, color pages, documents, charts, drawings, indoor advertising products, etc.

Why buy this full - auto roll cold laminator?

Laminating is a low cost way to protect and preserve everything from ID cards to restaurant menus. But did you know lamination does more than just protect? And that it protects in ways you may not have considered.

Lamination Preserves & Protects:

Here are a few ways lamination protects your materials, with an example of each:

Protects from spills: Sales presentation materials

Protects from rain: Little League team roster

Protects from grease and chemicals: Maintenance check list

Protects from smudges & fingerprints: menus

Protects from abrasion: Instructional materials

Protects from the sun: outdoor directional signs

Protects from creases and wrinkles: sales promotion material

Lamination provides low - cost long - term protection without the need for climate control or other special protective measures.

Lamination Improves Appearance:

Lamination improves the appearance of your materials in a variety of ways. For example, lamination:

Deeper and brightens colors; Enhances contrast; Dirt, grease and smudges can be cleaned off; Gloss, matte or satin finishes are available; Lamination gives your materials a finished, professional look of quality. Materials that are laminated just look better!

Lamination Can Improve Sales / Save Money:

By giving your materials a higher quality, professional look, lamination can improve your business image and help bring in more sales leads. Lamination can also save you money in a variety of ways, such as:

Laminated materials can be reused over and over

Expensive graphics are protected

Lamination stiffens signs and posters (additional backing is not needed)

Employees have proper identification helping to save time and reduce accidents.

You can make low-cost signs that resist weather

Lamination provides a durable way to protect and enhance almost any type of printed material. It improves the quality of materials by enhancing color and contrast, and providing a glossy "wet" look.
